

KAMAL P

Passionate About Applying Machine Learning Technologies to Build Innovative Solutions

Email : kamalpkamalp435@gmail.com

GitHub : <https://github.com/15-Kamal>

Linkedin : www.linkedin.com/in/kamal15

SUMMARY

Motivated Software Engineering student with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and Android App Development. Skilled in building real-world AI and full-stack applications using Python, TensorFlow, Scikit-learn and Kotlin. Experienced in data preprocessing, feature engineering, classification, prediction systems, and responsive mobile application development. Passionate about developing AI-powered solutions for healthcare, agriculture, and self-employment platforms. Strong understanding of modern software development practices.

EXPERIENCE

Student – Bengaluru, India

- Gave presentations on current technology and AI-related topics as part of academic coursework.
- Demonstrated strong organizational and multitasking skills while managing academic projects and workshops.
- Participated in campus career fairs, technical workshops, and collaborative learning events.
- Completed Machine Learning with AI certification from Internshala.
- Completed Introduction to Applied Machine Learning course on Coursera.
- Worked with tools and methodologies including Git, data visualization, and collaborative project development.

Machine Learning Intern – Unified Mentor (Jan 2026 – Mar 2026)

- Developed and evaluated machine learning models for real-world **classification and prediction** applications.
- Built projects including **ZooVisionAI**, **GuardianAI Fraud Detection**, and **AutoPriceML Vehicle Price Prediction**.
- Performed data preprocessing, feature engineering, model training, and model evaluation using Python.
- Worked with libraries and frameworks including Pandas, NumPy, Scikit-learn, TensorFlow, and OpenCV.
- Applied concepts of deep learning, neural networks, and computer vision in project development.
- Improved model performance through dataset cleaning, validation, and optimization techniques.
- Documented project outcomes and presented technical findings effectively.

Android App Development using Gen AI (Intern) – MindMatrix (Feb 2026 – May 2026)

- Learned **Kotlin**, **Jetpack Compose**, Generative AI fundamentals, and AI agent concepts.
- Built Android applications using modern UI development practices and reusable composable components.
- Developed **Kutira-Kushala**, a full-stack Android application that digitizes cottage industries such as basket weaving, papad making, and agarbatti production into searchable micro-factory profiles for bulk buyers.
- Implemented responsive UI screens and improved user experience using Jetpack Compose.
- Gained hands-on experience in Android development, API integration, and AI-assisted application design.

EDUCATION

Sri Venkateshwara College of Engineering, Bengaluru	2022-2026
Bachelor of Engineering, Computer Science Engineering: 7.75 CGPA	
Dolphin's PU College, Sidlaghatta, Chikkabalapura	2020-2022
PCMB: 89.3%	

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, Javascript, React.js, Next.js, Kotlin.
- **Backend:** Python, Node.js, MySQL, MongoDB, Firebase, Fast APIs.
- **Tools & Libraries:** Google-AI Studio, Android Studio, Google Cloud, Git, NumPy, Pandas, TensorFlow, Scikit-learn.
- **Other Skills:** Communication, Problem Solving, Data Analysis, Critical Thinking, Project Management.

PROJECTS

- **Kutira-Kushala App (Self-Employment)**
Built Kutira-Kushala, a full-stack Android app (Kotlin + Jetpack Compose) that empowers cottage industry entrepreneurs.
- **Crop Recommendation System (Synthetic Data Testing)**
Built a machine learning model for precision agriculture, applying synthetic data-driven validation for robustness.
- **ZooVisionAI-Animal Image Classification**
Built a Computer Vision pipeline using TensorFlow and OpenCV to preprocess, augment, and classify images of various animal species.
- **GuardianAI-Financial Fraud Detection**
Built a Machine Learning pipeline using Random Forest to classify fraudulent transactions within a highly imbalanced dataset of 1.75 million records.
- **AutoPriceML-Vehicle Price Prediction**
Built a predictive Machine Learning pipeline designed to estimate the market value of vehicles based on their specifications.
- **Portfolio** - Developed a responsive professional portfolio using Next.js, Framer Motion, and Lenis.

ADDITIONAL INFORMATION

- **Hackathons/Competitions:** Active participant in Hackathons.
- **Certifications:**
Machine Learning Course - **Internshala**
IR 4.0 Foundation Course - **TECHSaksham**
Machine Learning Internship - **Unified Mentor**
Android App Development Using Gen AI Internship - **MindMatrix**
- **Languages:** Kannada - Native, English - Advanced, Hindi - Intermediate, Telugu - Elementary.
- **Sports:** Kabaddi and Volleyball.
