KAMAL P

Bengaluru | +91-7795514450 | kamalpkamalp435@gmail.com | LinkedIn | GitHub

SUMMARY

Motivated Software Engineering student with hands-on experience in Machine Learning, Computer Vision, and Android App Development, skilled in building real-world AI and full-stack applications. Experienced in data preprocessing, feature engineering, classification, prediction systems, and responsive mobile application development.

SKILLS

Programming Languages & Frameworks: Python, SQL, HTML, CSS, Javascript, React.js, FastAPI.

Databases: MySQL, MongoDB.

Tools & Libraries: Google-AI Studio, Android Studio, VS Code, Google Cloud, Git, NumPy, TensorFlow, Scikit-learn.

Core Concepts: Data Structures & Algorithms, Operating Systems, Database Management Systems.

Other Skills: Communication, Problem Solving, Data Analysis, Critical Thinking, Project Management.

PROFESSIONAL EXPERIENCE

Android App Development using Gen AI (Intern) - MindMatrix *Feb 2026 – May 2026*

- Built Android applications using modern UI development practices and reusable composable components.
- Developed **Kutira-Kushala**, a full-stack Android application that digitizes cottage industries production into searchable micro-factory profiles for bulk buyers.
- Gained hands-on experience in **Android development**, API integration, and AI-assisted application design.

Machine Learning Intern - Unified Mentor *Jan 2026 – Mar 2026*

- Developed and evaluated machine learning models for real-world **classification and prediction** applications.
- Performed data preprocessing, feature engineering, model training, and model evaluation using Python.
- Worked with libraries and frameworks including Pandas, NumPy, Scikit-learn, TensorFlow, and OpenCV.
- Documented project outcomes and presented technical findings effectively.

PROJECTS

- **Kutira-Kushala App (Self-Employment)** ↗
  Developed a **Android application** using Kotlin and Jetpack Compose to connect micro-factories and cottage industries with bulk buyers through a searchable digital marketplace.
  Implemented **Firebase Authentication**, business registration, and real-time data management using Firebase Firestore.
- **GuardianAI-Financial Fraud Detection** ↗
  Developed a full-stack financial fraud detection system using Random Forest to classify fraudulent transactions from a highly imbalanced dataset of **1.75 million+ records**, leveraging **Python,** Flask, and **React.js**.
  Engineered behavioral features to identify complex fraud patterns, and optimized model performance using Scikit-learn, and NumPy.
- **ZooVisionAI-Animal Image Classification** ↗
  Developed a Streamlit-based web app using TensorFlow, and **Python** with a dual-model architecture for accurate predictions.
  Improved model reliability by applying confidence thresholding and probability-based decision logic for predictions.
- **Portfolio** ↗
  Developed a responsive personal portfolio using **Next.js, React,** and **CSS** to showcase projects, skills, and professional experience.
  Implemented Framer Motion animations, Lenis smooth scrolling, and active navigation highlighting to enhance user experience.

EDUCATION

Sri Venkateshwara College of Engineering, Bengaluru **2022-2026**
Bachelor of Engineering, Computer Science Engineering: 7.75 CGPA

CERTIFICATIONS

- **Certifications:** IR 4.0 Foundation Course - **TECHSaksham ,** Machine Learning Course - **Internshala ,** Machine Learning Internship - **Unified Mentor ,** Android App Development Using Gen AI Internship - **MindMatrix.**
